Summary

Computer Science undergraduate (CGPA 9.29) with hands-on experience in Artificial Intelligence, Machine Learning, Computer Vision, and Generative AI. Built end-to-end AI applications including a YOLOv8-based drowning detection system, an LLM-powered resume analyzer using LangChain and Groq Llama 3, and a customer churn prediction model.

Education

B.Tech in Computer Science and Engineering

Amity University Haryana

2023 – 2027

CGPA: 9.29

Senior Secondary (Class XII) – CBSE

SCR Public School

2021 – 2022

Percentage: 88.66%

Secondary (Class X) – CBSE

SCR Public School

2019 – 2020

Percentage: 91.16%

Internship

Data Science & AI/ML Intern

YBI Foundation

Jun 2025 – Jul 2025

Python, Scikit-learn, Pandas, NumPy

- Completed a Data Science & AI/ML internship focused on supervised machine learning and predictive analytics.
- Performed data preprocessing, feature engineering, feature scaling, and class imbalance handling on real-world datasets.
- Applied model evaluation techniques including Precision, Recall, F1-score.

Projects

AI-Based Drowning Detection System | Python, YOLOv8, OpenCV, Roboflow, DroneKit 🔗 [Live Demo](#) May 2026

- Collected and annotated 4,846 drowning images using Roboflow and trained a custom YOLOv8 object detection model.
- Built a real-time OpenCV application using the Roboflow Inference API to detect drowning persons with bounding boxes and confidence scores.
- Integrated DroneKit to simulate autonomous drone navigation toward detected victims for rescue assistance.

AI Resume Analyzer & Job Matcher | Python, Streamlit, LangChain, Groq Llama 3 🔗 [Live Demo](#) Feb 2026

- Built an AI-powered resume analyzer using Streamlit, LangChain, and Groq Llama 3 for resume evaluation and recommendations.
- Developed a job matching module to compare resumes with job descriptions, identify skill gaps, and generate AI-based match scores.
- Implemented an ATS checker with PDF parsing, keyword analysis, resume scoring, and actionable feedback.

Bank Customer Churn Prediction | Python, Scikit-learn, Pandas, NumPy, Gradio 🔗 [Live Demo](#) Jul 2025

- Built an SVM-based customer churn prediction model using Python, Pandas, NumPy, and Scikit-learn.
- Performed preprocessing, feature encoding, scaling, and class balancing using RandomOverSampler.
- Developed an interactive Gradio web app for real-time churn prediction with probability visualization.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript

AI/ML & Computer Vision: Machine Learning, Computer Vision, YOLOv8, OpenCV, Pose Estimation, NLP, Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, Gradio, LangChain, Groq API

Web Development: MongoDB, Express.js, React.js, Node.js, HTML, CSS, Bootstrap

Developer Tools: Git, GitHub, VS Code, Roboflow

Core CS: Data Structures & Algorithms (Java), Object-Oriented Programming (OOP), DBMS

Awards & Certifications

- AI Program Conducted by Samsung Innovation Campus | 🔗 [View Certificate](#)
- Generative AI Foundations using Google Cloud | 🔗 [View Certificate](#)
- Data Science and AI/ML Internship Certificate | 🔗 [View Certificate](#)
- Delta – Full Stack Web Development Certification | 🔗 [View Certificate](#)
